1 UNITED STATES DISTRICT COURT  
2 FOR THE NORTHERN DISTRICT OF CALIFORNIA  
3 SAN FRANCISCO DIVISION

4  
5 Lead Case No. 3:21-cv-03825-VC

6 -----x

7 IN RE: Da Vinci SURGICAL ROBOT  
ANTITRUST LITIGATION

8 -----x

9 AND RELATED CASE.

-----x

10 March 15, 2023

11 9:07 a.m.

12

13

14 Remote Virtual Zoom Deposition of  
15 KIMBERLY A. TRAUTMAN take Plaintiff, pursuant  
16 to Notice, with the Witness located at the  
17 offices of Covington & Burling 850 Tenth Street  
18 NW, Washington, D.C., before William Visconti,  
19 a Shorthand Reporter and Notary Public within  
20 and for the State of New York.

21

22

23

24

25

1 KIMBERLY ANN TRAUTMAN

2 discussions, I'm sure there were. Whether that  
3 specific question was asked outright, I don't  
4 remember.

5 Q. Do you remember whether when  
6 you were doing your work for Trautman International  
7 Services on the general consulting side,  
8 whether any clients came to you and said, we  
9 are trying to figure out whether we qualify as  
10 a re-manufacturer under the Quality System  
11 Regulation?

12 A. I do not remember any  
13 remanufacturing discussions per se under those  
14 couple of months under Trautman International  
15 Services, no.

16 Q. What do you mean by per se?

17 A. I'm sorry, I have to ask the court  
18 reporter to read it back please.

19 Q. That's okay, I won't make you stop  
20 what you're doing.

21 You said you do not remember any  
22 remanufacturing discussion per se under those  
23 couple of months. That is what you just said.  
24 And I was trying to understand what you meant  
25 when you said per se in that answer?

1 KIMBERLY ANN TRAUTMAN

2 A. It was really just I'm trying to  
3 think of some of the clients that I had  
4 discussions of servicing and whether the topic  
5 of remanufacturing came up particularly. I  
6 don't think so, but I don't remember.

7 Q. So did you have clients who you  
8 characterized an engaged in servicing?

9 A. I had clients that had servicing  
10 as part of their quality management system,  
11 yes, sir.

12 Q. What is your definition of  
13 servicing in this context?

14 A. Servicing is capital equipment  
15 that has either preventive maintenance or other  
16 mechanisms by which the device comes back to a  
17 particular center, whether that be the client's  
18 or a subcontracted arranged service center.  
19 And typically there is checklist of looking at  
20 what the device is as it arrived into the  
21 service center. There is procedures and  
22 protocols as far as cleanliness and so forth  
23 both for the safety of the workers as well as  
24 further progressing into ensuring that there is  
25 appropriate cleaning and cleaning disinfection.

1 KIMBERLY ANN TRAUTMAN

2 Sometimes there is wear out  
3 failures, other types of component replacements  
4 and like I said, that is typically done according to  
5 set procedures and that's the type of servicing  
6 that I would be referring to.

7 Q. In your general consulting work  
8 for Trautman International Services, did you  
9 have any clients who came to you and said they  
10 were contemplating modifying a finished device  
11 in commercial distribution and asked you  
12 whether the modifications they had would  
13 significantly change the performance or safety  
14 specifications or intended use?

15 A. Yes, sir, there were those general  
16 discussion, yes, sir.

17 Q. What do you recall about those  
18 discussions? Do you recall any specific type  
19 of devices that you were asked to consult on on  
20 that topic?

21 A. I do. They had to do with  
22 different types of reusable scopes.

23 Q. When say reusable scopes, are you  
24 talking about scopes for colonoscopies,  
25 endoscopies?

1 KIMBERLY ANN TRAUTMAN

2 A. The line of products was quite  
3 diverse, so they had everything from to  
4 endoscopes to bronchoscopes, to a whole line  
5 of different reusable scopes for different  
6 purposes.

7 Q. Was the client that you're  
8 thinking of in that situation the original  
9 manufacturer of those scopes?

10 A. Yes, sir.

11 Q. When was that engagement?

12 A. Shortly after I had the LLC.

13 Q. How long did that last?

14 A. It was actually a continuation of  
15 some work from my previous employer who the  
16 client wanted specifically to continue my  
17 engagement and it was agreed upon, so that was  
18 a continuation. So, again, almost immediately  
19 since they were a current client.

20 Q. The company that you were talking  
21 about before, is that NSF International?

22 A. Yes.

23 Q. You were with NSF International  
24 for a little over five years from 2016 to 2021?

25 A. Correct.

1 KIMBERLY ANN TRAUTMAN

2 more officially 2012 to 2015, '16 that program  
3 was formulated, signed off by the heads of  
4 agencies and really took off and it is now an  
5 official program for the different governments.

6 Q. Going back to NSF for a moment.  
7 You said one of the things that you did was you  
8 had consulting activities at NSF; is that right?

9 A. Yes, sir.

10 Q. And you said at some point while  
11 at NSF you started working with an OEM that had  
12 reusable scopes; is that right?

13 A. I did and it was more than one,  
14 but yes, there was one client that followed me  
15 per their request when I left, yes.

16 Q. You had other manufactures of  
17 reusable scopes besides the one that followed  
18 you to your LLC?

19 A. Yes.

20 Q. How many did you have?

21 A. Specifically for -- at least two  
22 and some of the companies had some scopes in  
23 their portfolio. It may not have been my major  
24 focus, but I would say there was probably at  
25 least between 2 to 4 or 2 to 5.

1 KIMBERLY ANN TRAUTMAN

2 A. Regulatory and quality issues,  
3 yes.

4 Q. When you say quality issues, what  
5 are you thing of?

6 A. For me like you said they are very  
7 intertwined. In the biggest sense regulatory  
8 can cover everything. But also some people  
9 differentiate the quality management system and  
10 quality management system audit out separately  
11 from an application type of scope or deliverable.

12 Q. So focusing on your consulting  
13 work since you left FDA to the present, have  
14 you ever had any engagement with independent  
15 servicing organizations?

16 A. Not since I left FDA prior to this  
17 case.

18 Q. Have you had any -- since you  
19 began your consulting in January of 2016 to the  
20 present, have you had any engagements that had  
21 any involvement with the da Vinci Surgical  
22 System?

23 A. No, sir.

24 Q. Have you had any engagements since  
25 January, 2016 that relate -- that have anything

1 KIMBERLY ANN TRAUTMAN

2 to do with EndoWrist?

3 A. No, sir.

4 MR. MC CUAIG: Objection, Andrew,  
5 are you talking about just consulting  
6 arrangements in all of these questions?

7 MR. LAZEROW: Yes.

8 A. So not counting the case that we  
9 are talking about?

10 Q. Right.

11 A. Correct.

12 Q. Let's me ask it the other way.

13 MR. LAZEROW: Thank you, Dan, I  
14 appreciate the help there.

15 Q. Let me ask it this way. Is this  
16 case the only matter on which you provided any  
17 services that relates to the da Vinci Surgical  
18 System or EndoWrist?

19 A. Yes, I believe that is correct,  
20 right.

21 Q. You started at FDA in 1991?

22 A. Yes.

23 Q. Do I have it right, from 1991  
24 until 1996 the focus of your efforts at FDA was  
25 the Quality System Regulation?

1 KIMBERLY ANN TRAUTMAN

2 different commodities, not just medical  
3 devices.

4 And then when a different  
5 standards group opened up related to specific  
6 medical device standards, which is called  
7 Technical Committee, TC 210, I was involved  
8 with that and that was also around the 1994  
9 timeframe. I was then given -- I was a branch  
10 chief in the Office of Compliance, I was a  
11 cardiovascular branch chief in the Office of  
12 Compliance in, gosh, maybe the '93, '94  
13 timeframe. So I was also doing management of  
14 folks that were similar to some of the  
15 descriptions that I just gave you.

16 Then I was put on detail and led  
17 the effort to finalize the regulation to handle  
18 promulgation of the regulation, the preamble  
19 around, I think it was around the 1994 time.

20 Q. From 1991 until 1996 were you ever  
21 in the office of device evaluation?

22 A. No, sir.

23 Q. Have you ever been a lead reviewer  
24 on any 510(K) applications?

25 A. No, sir, not at all during my time

1 KIMBERLY ANN TRAUTMAN

2 at FDA I was not lead reviewer in the Office of  
3 Device Evaluation.

4 Q. Were you a supervisor of any  
5 reviewers at your time at the FDA?

6 A. Was I -- yes, I just mentioned I  
7 was a supervisor in the Office of Compliance in  
8 the cardiovascular branch.

9 Q. When you were in that branch, did  
10 you have reviewers who reported up to you?

11 A. In the same reviewers as in a  
12 generic sense?

13 Q. No, reviewers of 510(K)  
14 applications.

15 A. Okay, I just wanted to make sure  
16 because there is a difference.

17 So I did not have 510(K) reviewers  
18 report up to me. We would issue consults to  
19 them. So I would be in charge of making sure  
20 that consults were sent to them and taking the  
21 outputs of those consults and furthering them  
22 into enforcement actions as appropriate.

23 Q. At the time that you were at FDA,  
24 am I right that the Office of Compliance and  
25 the Office of Device Evaluation were separate

1 KIMBERLY ANN TRAUTMAN

2 offices within CDRH?

3 A. Yes, sir. Except for the -- in  
4 the in vitro diagnostic area, they were  
5 combined. But again, my position at that point  
6 was outside of that in vitro diagnostic life  
7 cycle division.

8 MR. LAZEROW: Let's make this a  
9 little easier on you. I'm going to mark  
10 tab 1 as Defendant's Exhibit 287. This is  
11 the expert report of Kimberly A. Trautman.  
12 You should have that in front of you and  
13 hopefully Dan has a copy also.

14 MR. MC CUAIG: I do.

15 MR. LAZEROW: We will mark that as  
16 DX 287.

17 (DX Exhibit 287 for identification,  
18 Expert report of Kimberly A. Trautman.)

19 Q. Do you have your report in front  
20 of you?

21 A. Yes.

22 Q. If you want to flip through it, is  
23 that a copy of report that you submitted in  
24 this matter on December 2nd, 2022?

25 A. Yes, sir, it looks like the report

1 KIMBERLY ANN TRAUTMAN

2 all the way through even when I became the  
3 associate director for international, sometimes  
4 there I would be requested for consultations,  
5 but that would not have been my primary job.  
6 So roughly from '91 until that Novemberish,  
7 2011 timeframe.

8 Q. Did you have a focus in any  
9 particular type of issues that the Office of  
10 Compliance was looking at with respect to  
11 potential enforcement actions?

12 A. No, sir, I would say that my  
13 experience ran the gamut.

14 Q. And so when you say ran the  
15 gamut, are you including your experience -- did  
16 you have experience in enforcement actions by  
17 the FDA vis-a-vis companies that did not have  
18 510(K) clearance but the agency believed  
19 required it?

20 A. Yes, sir.

21 Q. Do you have any specific  
22 recollection of any particular types of devices  
23 where you had that kind of experience?

24 A. Oh my gosh. There has been to  
25 many enforcement -- so everything from

1 KIMBERLY ANN TRAUTMAN

2 administrative actions -- so I will consider  
3 enforcement actions kind of run the gamut of  
4 administrative all the way through to judicial.  
5 So I was involved with many warning letters  
6 that had a variety of different allegations  
7 from lack of 510(K) to inadequate medical  
8 device reports, to lack of registration and  
9 listing to Quality System Regulations.

10 So administrative actions, civil  
11 money penalties. I worked on some of the  
12 agency's first 518 mandatory recall aspects.  
13 And I began several different aspects of a 518 A  
14 and E provisions. Worked on seizures,  
15 injunctions, criminal cases.

16 A lot of times those cases were  
17 not a single regulation violation. So often  
18 times there were multiple different regulations  
19 that were involved in those enforcement  
20 actions.

21 Q. Focusing on actions that involved  
22 an entity that did not have premarket clearance, but  
23 the agency believed it needed that clearance.  
24 Are you with me?

25 A. Yes, sir.

1 KIMBERLY ANN TRAUTMAN

2 Q. Were you the person who determined  
3 whether the premarket clearance was required or  
4 not?

5 A. As explained earlier, I would have  
6 issued a consult out to the organization that  
7 specifically handled -- see there is particular  
8 divisions within even with the Office of Device  
9 Evaluation for 510(K) or in other regulations,  
10 for example the Office of Surveillance and  
11 Biometrics for medical device reports, we would  
12 issue, we being the Office of Compliance, would  
13 issue those consults out, pull it together, put  
14 the case together and then work with chief  
15 counsel on the totality of the case.

16 Q. Is the word consult a technical  
17 term of art in this context?

18 A. It's consultation. So it was a  
19 consultation process where there would be often  
20 times it would start off with some written,  
21 especially early on, a memo, in our days I'm  
22 sure it is more just an e-mail. But there  
23 would be a specific request to the other office  
24 as to this is the question, here is the  
25 evidence and here is what we would like you to

1 KIMBERLY ANN TRAUTMAN

2 that I'm asking which is up until the point you  
3 get a consultation, a request for consultation,  
4 okay, and they say we want you to weigh in on  
5 whether this particular issue that I'm bringing  
6 to you requires premarket clearance. Okay.  
7 Are you with me?

8 A. So I'm with you, but in my  
9 experience the roles were more reversed. As we  
10 established, the majority of my earlier career  
11 was in the Office of Compliance and we would  
12 not always or it was not as common for us to  
13 get the consultation versus us to send out the  
14 consultation.

15 Q. What is the difference?

16 A. Well, the difference is in some of  
17 the roles that we just discussed as an international  
18 expert for quality systems, I may personally  
19 get a consultation request on a particular  
20 finding or piece of evidence or investigation  
21 and be asked to opine on whether this would  
22 constitute a nonconformance to this regulatory  
23 requirement related to the Quality System  
24 Regulation.

25 In the reverse, if someone in the

1 KIMBERLY ANN TRAUTMAN

2 Office of Compliance had evidence that wanted  
3 to have -- the people that were directly responsible for  
4 a clearance or PMA approval, that consultation  
5 would go from the Office of Compliance to the  
6 Office of Device Evaluation and ask those  
7 questions and then be brought back to the  
8 Office of Compliance for case development.

9 Q. I'm focusing on the first part  
10 that you just talked about. The first situation  
11 where you get a consultation request on whether  
12 a particular finding or piece of evidence  
13 constitutes nonconformance with regulatory  
14 requirement. Okay. That's what I'm focusing  
15 on.

16 A. Okay.

17 Q. When you got that consultation,  
18 did you take any particular steps to satisfy  
19 yourself whether there was conformance or  
20 nonconformance with regulatory requirements?

21 A. Yes, I -- my responsibility would  
22 be to ensure that there was objective evidence  
23 and to make sure that objective evidence  
24 supported that quality system nonconformance.  
25 I was going to say and if I didn't find all the

1 KIMBERLY ANN TRAUTMAN

2 were engaged in commercial activity?

3 A. I would have to ask you to define  
4 what you mean by commercial activity.

5 Q. What is your understanding of the  
6 phrase commercial activity?

7 A. I tried to give you that context  
8 by saying are they providing a service just  
9 like I provide a consulting service and charging for  
10 that service, yes.

11 Q. What is your understanding of  
12 whether Restore and Robotix were charging  
13 hospitals?

14 A. Were they charging hospitals, the  
15 evidence that I saw there was a charge for  
16 their activities, yes.

17 Q. So from your perspective they were  
18 providing a service to hospitals, right?

19 A. They were providing a service to  
20 the hospitals, yes, sir.

21 Q. So from your understanding of the  
22 phrase commercial activity, Restore and Robotix  
23 were engaged in commercial activity, right?

24 A. In the confines of the  
25 hypothetical that we discussed.

1 KIMBERLY ANN TRAUTMAN

2 Q. Did you see anything that  
3 suggested they were a nonprofit?

4 A. I did not. You're talking about  
5 Robotix, no, I did not in any -- I had no  
6 indication. I just wanted to make sure we  
7 weren't talk about a nonprofit hospital.

8 Q. No, sorry. Apologies.

9 A. No, I didn't see any indication  
10 that those IRCs were nonprofit.

11 Q. The devices that they were  
12 servicing, the EndoWrists they were servicing,  
13 they were intended for use with patients; isn't  
14 that right?

15 A. I would assume so, yes.

16 Q. To your knowledge, do you know  
17 whether some of those devices that Restore or  
18 Robotix serviced were used with patients?

19 A. Again, I believe there is an  
20 assumption in the fact that there is evidence  
21 of their products going back to healthcare  
22 facilities. Was I able to or did I do any type  
23 of tracking to see that, no, that was not  
24 within the confines of the scope of my work in  
25 this case.

1 KIMBERLY ANN TRAUTMAN

2 Q. Is it your understanding that  
3 these devices were not for the personal  
4 consumption of Restore and Robotix? Is that  
5 fair to say?

6 A. So Restore and Robotix were not  
7 going to perform surgery on themselves, that is  
8 correct.

9 Q. And the hospitals were, to your  
10 knowledge were using these devices to perform  
11 surgery on patients, right?

12 A. I would assume so, yes.

13 Q. You would also assume that these  
14 patients were paying the hospitals in some  
15 manner or form whether directly or through  
16 insurance for the surgery, would you agree with  
17 me on that?

18 A. Again, I would assume so, yes,  
19 sir.

20 Q. In preparation of your report that  
21 we are looking at which is marked as DX 287,  
22 what research, if any did you do into the  
23 meaning of the phrase held for sale or offered  
24 for sale?

25 A. I went back to the FDA website to

1 KIMBERLY ANN TRAUTMAN

2 earlier in the day about how FDA officials have  
3 to do exploratory processes, how they need to  
4 investigate and that is what Mr. Lee was doing  
5 and he was exploring those and discussing how  
6 certain things might be remanufacturing and  
7 what he thought might be or what might not be  
8 later on, but ultimately when the discussions  
9 came to a collusion in July of 2022, there was  
10 no official determination that that activity  
11 was remanufacturing.

12 Q. At the time that you submitted  
13 your opening report in this matter, did you  
14 know there were other people at FDA who had  
15 told third-parties like Robotix and Restore  
16 that they considered their activities to be  
17 remanufacturing?

18 MR. MC CUAIG: Objection.

19 A. Again, I looked at several  
20 different documents, what I was focused on was  
21 what did FDA officials come out and did they  
22 give any official type of communication, was  
23 there any type of, it has come to our attention  
24 letter, was there any type of formal  
25 communication to an entity that said, according

Page 156

1 KIMBERLY ANN TRAUTMAN

2 to this provision of the law you're doing this  
3 and you should file a 510(K), letters that I  
4 have see many, many, many times throughout my  
5 career and I didn't see any of those in this  
6 case in the communications.

7 So informal communications that  
8 are happening between different officials  
9 throughout FDA, did I review them, were I aware  
10 of them, I cited some, others are in my  
11 reliance list, but again, I was focused for  
12 purposes of my review and report on what the  
13 agency came out as their official determination.

14 Q. What does it mean it has come to  
15 our attention letter?

16 A. So this is typically something  
17 when it was not through the inspection process  
18 that we had previously talked about this  
19 morning. During the inspection process an FDA  
20 investigator would have been able to collect  
21 different tangible objective evidence to lay  
22 out a scenario and if a 510(K) or other  
23 regulatory requirements were not being met,  
24 they could have gone to what is called a  
25 warning letter. But instead of going to a

1 KIMBERLY ANN TRAUTMAN

2 warning letter or regulatory meeting  
3 administrative action, it's come to our  
4 attention letter was rather a step below that  
5 from administrative purpose. And that is where  
6 whether it be through promotional or  
7 advertising pieces of evidence, FDA may, again,  
8 just what it says, it may have come to their  
9 attention through different sources that this  
10 activity was ongoing and that that activity  
11 would require a particular compliance with a  
12 regulation or in this case a 510(K). And it  
13 would notify that recipient officially that  
14 this was the agency's thinking.

15 Q. Do you consider an it has come to  
16 our attention letter to be informal communication  
17 by FDA?

18 A. No, sir. They actually had -- it  
19 was titled -- it was an official correspondence.  
20 Now it might have been via e-mail, but on an  
21 FDA letterhead. It was not just discussions  
22 and e-mails going back and forth between  
23 individuals. And those letters -- it's come to  
24 out attention letters had different authorities  
25 as to who could signed those letters within the

Page 158

1 KIMBERLY ANN TRAUTMAN

2 agency.

3 Q. So from what you said, I take it  
4 it has not come to our attention that FDA sent  
5 an it has come to our attention letter to  
6 Robotix?

7 A. If one exists, I'd be happy to  
8 look into that further.

9 Q. Can you answer my question? It  
10 has not come to your attention as of today that  
11 the FDA sent an it has come to our attention  
12 letter to Robotix, correct?

13 A. Not that I remember off the top of  
14 my head.

15 Q. Looking back at paragraph 34 of  
16 your report. The Deutsche Bank report, you  
17 said you cited this in part because there were  
18 other folks who had come to the same view you  
19 had about whether that constituted remanufacturing  
20 or not, right?

21 A. As well as the question as to  
22 whether FDA was likely to take an enforcement  
23 action, both of those prongs were pertinent in  
24 that series with Deutsche Bank exhibits.

25 MR. MC CUAIG: Can we pause for a

Page 159

1 KIMBERLY ANN TRAUTMAN

2 second. I got text from Jeff Corrigan that  
3 he got bounced off the Zoom.

4 MR. LAZEROW: Let's go off the  
5 record.

6 THE VIDEOGRAPHER: The time is now  
7 1:27 going off the video record.

8 (Recess taken.)

9 THE VIDEOGRAPHER: The time so now  
10 1:29 back on the video record.

11 BY MR. LAZEROW:

12 Q. Who were the people who Deutsche  
13 Bank talked to for their report?

14 A. So my understanding was from the  
15 deposition of the gentleman who wrote the  
16 report was that he did not divulge the five  
17 experts that he had interviewed.

18 Q. So you don't know who those people  
19 actually are?

20 A. No, sir.

21 Q. Were you one of the people?

22 A. No, sir.

23 Q. Have you talked to anyone who told  
24 you they were one of the people?

25 A. No, sir.

1 KIMBERLY ANN TRAUTMAN

2 Q. Did you do anything to investigate  
3 who those people were before you cited the  
4 Deutsche Bank report in your expert report?

5 A. Not outside of looking at the  
6 documents in the report and the deposition of  
7 the gentleman that wrote the report.

8 Q. Earlier you said that these were  
9 experts who were looking at the facts who  
10 agreed with you. Do you remember saying that?

11 A. Not exactly those words, but they  
12 were experts that were being asked to opine on  
13 whether the activities of third-parties doing  
14 the refurbishing functions that were described  
15 with da Vinci as to, A, whether a 510(K) was  
16 necessary and whether it was likely that FDA  
17 would have an enforcement action.

18 And again, one of the areas that I  
19 was focusing on in this report and the supplemental  
20 report was the whole concept that I was aware  
21 of in the discussions back from the '90s is  
22 whether the third-parties were actually  
23 providing a service to the hospitals and  
24 returning those devices to the hospitals or  
25 whether they were collecting and servicing and

1 KIMBERLY ANN TRAUTMAN

2 putting them into commercial distribution via  
3 selling or reselling mechanisms.

4 Q. You do not know what information  
5 was available to the individuals that Deutsche  
6 Bank talked to at the time they talked with  
7 Deutsche Bank, right?

8 A. Not outside -- there was the  
9 report, there was graphs and PowerPoints and  
10 the deposition of the authors, the evidence  
11 that I had.

12 Q. The deposition of the author did  
13 not describe the information that was available  
14 to the people that he spoke to for that report,  
15 right?

16 A. Not exactly. If I remember  
17 correctly, he did go into some of the questions  
18 that he asked them, but I do remember the fact  
19 that he didn't remember or was unwilling, I  
20 honestly don't remember, but I have no  
21 knowledge of who the individuals that he  
22 consulted with, who they were.

23 Q. Does it matter to you who they  
24 were?

25 A. No. Again, I don't know what

1 KIMBERLY ANN TRAUTMAN

2 qualifies as FDA experts. So my reliance on  
3 that was more on the fact that there were other  
4 people who in some way, shape or form had been  
5 qualified as expertise in that area and they  
6 were thinking and asking the same questions  
7 that I were and they came to a similar  
8 conclusion.

9 Q. Qualified by Deutsche Bank?

10 A. It could have been a consortium  
11 like GLG or Guidepoint or other folks. I know  
12 I have opined for investment companies on  
13 issues similar to this. Not anything to do  
14 with this particular issue. It could have  
15 been -- they could have been vetted through  
16 another consortium.

17 Q. Do you know what standard  
18 Deutsche Bank used to determine that these  
19 folks were FDA experts?

20 A. Not outside of the testimony from  
21 the author.

22 Q. Do you know what information they  
23 were given to review before they talked with  
24 Deutsche Bank?

25 A. Again, I know what he talked about

1 KIMBERLY ANN TRAUTMAN

2 as far as the interviews. I don't know if he  
3 gave them or provided them any tangible  
4 websites or anything. I just know from his  
5 testimony that he had given scenarios and  
6 given information to them and on that  
7 information they provided an opinion.

8 Q. So the sum total of what you  
9 know about that report is the report itself and the  
10 deposition of the author, is that a fair  
11 statement and the exhibits used at the  
12 deposition, is that a fair statement?

13 A. Yes, sir. Again if the PowerPoints  
14 and some of the graphs and so forth are all  
15 considered up, I used the report in the bigger  
16 sense, because I remember there was a couple of  
17 different formats that that information was  
18 presented.

19 Q. Do you know if the people that  
20 Deutsche Bank spoke to spoke to the FDA before  
21 they gave their views to Deutsche Bank?

22 A. I do not know that one way or the  
23 other.

24 Q. Have you talked to anyone at FDA  
25 since you have been retained in this matter

1 KIMBERLY ANN TRAUTMAN

2 previously marked.)

3 Q. Can you take out exhibit tab 35.  
4 Tab 35 has already been marked as Defendant's  
5 Exhibit 268.

6 A. Yes, sir.

7 Q. Do you have DX 268 before you?

8 A. I do, yes, sir.

9 Q. This is a letter from Mark  
10 Trumbore to Chris Gibson at Robotix dated  
11 November 16th, 2021, do you see that?

12 A. I do, yes, sir.

13 Q. You've never read this letter  
14 before today; correct?

15 A. It does not look familiar to me.  
16 So I would have to back and look at the list.

17 Q. You're welcome to do that. I will  
18 tell you it is not on either list attached to  
19 your report, right?

20 A. I will believe you because it  
21 doesn't -- sitting here right now it doesn't  
22 look familiar.

23 Q. I thought earlier you said you had  
24 not seen an it has come to out attention letter  
25 in that matter?

1 KIMBERLY ANN TRAUTMAN

2 A. I mean, interesting that they did  
3 away with some of the formality, but the  
4 opening sentence does say it has come to our  
5 attention, yes, sir.

6 Q. This letter says, "it has come to  
7 our attention that you may be remanufacturing  
8 the da Vinci S EndoWrist Instruments which  
9 appear to meet the definition of a device as  
10 that term is defined in Section 201(h) of the  
11 Federal Food Drug and Cosmetic Act, (FD&C) in a  
12 manner that potentially violates the FD&C Act."  
13 Do you see that?

14 A. Yes.

15 Q. Do you know Mark Trumbore?

16 A. I know him not on a personal  
17 level, but I know that he is one of the supervisors.

18 Q. When you look at his signature, he  
19 appears to be the assistant director of the  
20 Division of General Surgery Devices; is that  
21 right?

22 A. That is correct, yes, sir.

23 Q. And in November of 2021 do you  
24 know who besides Mr. Trumbore would have to  
25 approve and sign off on an it has come to our

1 KIMBERLY ANN TRAUTMAN

2 case, just in general. They said we are  
3 engaged in remanufacturing, we are going to  
4 submit a 510(K). So that's a -- they are  
5 taking this third-party, there is an original  
6 equipment manufacturer, has a 510(K) and they  
7 are taking a device that's already in commercial  
8 distribution, they are remanufacturing it and  
9 they are going to submit a 510(K).

10 You would not characterize that  
11 510(K) by that third-party as a catchup 510(K)?

12 A. I would not.

13 Q. So a third-party servicer could  
14 not submit a 510(K)? Like if someone -- forget  
15 it, I got it.

16 At the time that you submitted  
17 your opening report in this matter, December 1st,  
18 2022, were you aware that there was a product  
19 code for remanufactured EndoWrists?

20 A. I believe that product code came  
21 out after December 1st. So my answer is, I did  
22 not see the Iconocare 510(K) and I actually saw  
23 it first in trade press until after my first report.

24 Q. The Iconocare -- let's make sure  
25 we are on the same page. The Iconocare 510(K)

Page 316

1 KIMBERLY ANN TRAUTMAN

2 clearance came on September 30th, 2022 or end  
3 of September 2022. Is that consistent with  
4 your memory?

5 A. I honestly didn't remember the  
6 timeline, so then I was not aware of the  
7 Iconocare 510(K) until after I submitted the  
8 first report, I believe.

9 Q. You weren't aware of the product  
10 code?

11 A. Well the product code didn't exist  
12 until the Iconocare 510(K) came out.

13 Q. So at the time that you submitted  
14 your expert report in this matter you were not  
15 aware of the QSM product code?

16 A. I honestly don't remember from the  
17 past couple of -- the past two, three months  
18 between the two different reports when that  
19 came into play. I have to go back and look at  
20 the reliance list to see.

21 Q. Do you want to look at your  
22 reliance list on Exhibit 1?

23 A. I will be happy for you to tell me  
24 one way or the other.

25 Q. You cite to the Iconocare letter,

Page 317

1 KIMBERLY ANN TRAUTMAN

2 third-parties who were engaged in remanufacturing  
3 as that term is defined in the Quality System  
4 Regulation?

5 MR. MC CUAIG: Objection to the  
6 form.

7 A. Can you ask the question again,  
8 please?

9 Q. Do you agree that FDA continues to  
10 this day to enforce existing requirements to  
11 third-parties engaged in remanufacturing as  
12 that term is defined in the QS Regulation?

13 MR. MC CUAIG: Objection to the  
14 form.

15 A. I was say if the agency has  
16 determined a manufacturer to be a manufacturer  
17 or a re-manufacturer, then the applicable  
18 regulatory requirements are applied.

19 Q. You reference in your report the  
20 510(K) regulation. Are you familiar with that?

21 A. 807 in general you mean, yes, sir.

22 Q. Were you involved in drafting that  
23 regulation?

24 A. No, sir.

25 Q. I can't remember back to this
